One-Connect

Interface Boards & Cables

IDS is proud to announce One-Connect. One-Connect is a simplified display connection integrating power, display and touch signals through a single interface cable. When bundled with an IDS custom engineered interface board, our clients will have an elegant, easy to assemble plug-n-play touchscreen monitor solution.

Our standard offering includes: 5" WVGA, 7" WVGA, 7" WSVGA, 10.1" WXGA and 15.6" FHD; customizations are also available. Our commitment is to provide industrial grade robustness and product longevity; up to 10 years.

Integrated Connectivity

All-In-One Cable
