# SPECIAL SHAPE DISPLAYS

Our special shape TFT displays are tailored to fit your unique design requirements, whether it's perfectly square, fully circular, or stretched bar-type, we got you covered. These displays leverage the latest in TFT technology to deliver superior image quality, vibrant colors, wide-viewing, and high resolution.

Touch panel integration and cover lens optical bonding are optional to enhance user experience, providing intuitive interactions and aesthetically pleasing designs, making your product not just functional but a pleasure to use.

Common applications include avionic cockpit, digital gauge, information signage, and many others.

## Square, Circular, or Bar-Type
